PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience in Backend Development and 3+ years of hands-on DevOps experience. Skilled in Laravel, PHP, MySQL, PostgreSQL, AWS, Docker, Kubernetes, Terraform, GitHub Actions, and Azure. Experienced in designing, deploying, and maintaining enterprise applications and cloud infrastructure across the complete software lifecycle. Passionate about automation, AI-assisted engineering, and building secure, scalable, production-ready systems.

TECHNICAL SKILLS

Cloud	AWS (EC2, S3, RDS, IAM, VPC, Route53, CloudWatch), Azure, On-Premises Servers
Containers & Orch.	Docker, Kubernetes (EKS, AKS), Helm
CI/CD & Automation	GitHub Actions, Azure DevOps
Infrastructure	Terraform, Ansible
Scripting	Python, Bash, PowerShell, Shell
Monitoring	Prometheus, Grafana, AWS CloudWatch, Alert Manager
Security & Secrets	TLS/HTTPS, RBAC, IAM Policies, VPC Networking, Secrets Management
Databases & Caching	MySQL, PostgreSQL, Redis
Backend & Frontend	PHP (Laravel), CodeIgniter, Node.js REST APIs React.js, JavaScript, HTML5, CSS3, Bootstrap
AI Tools	OpenAI API, Claude, Gemini, LLM, Generative AI
Version Control	Git, GitHub
AI-Assisted Engineering	AI-assisted Development, Prompt Engineering, LLM Workflow Automation
Web Servers	Linux Administration, Nginx, Apache

PROFESSIONAL EXPERIENCE

Senior Backend & DevOps Engineer

Probsolve Technology Vadodara, Gujarat
7+ years Backend | 3+ years DevOps

Sep 2019 – Present

Joined as a Backend Engineer and gradually expanded responsibilities into DevOps and Cloud Infrastructure. Worked across the complete software lifecycle—from designing enterprise applications and APIs to automating deployments, managing production environments, and improving system reliability.

Backend Engineering

- Designed, developed, and maintained enterprise applications including ERP, HRMS, CRM, Payroll, Expense Management, FMS, and custom business solutions using Laravel, PHP, MySQL, and PostgreSQL.
- Developed secure RESTful APIs and integrated third-party services including Razorpay, HDFC Smart Gateway, Paymobe, Hesabes, Google Drive, OneDrive, and other business applications.
- Contributed to Node.js, React, and WordPress projects for custom business requirements, integrations, and application enhancements.
- Optimized MySQL and PostgreSQL databases through query tuning, indexing, schema optimization, and Redis caching, improving application performance and scalability.

- Customized and extended Odoo ERP modules while integrating enterprise applications to streamline business workflows and improve operational efficiency.
- Maintained and enhanced production applications by delivering new features, resolving critical production issues, optimizing application performance, and ensuring long-term system stability.

DevOps & Cloud Engineering

- Designed and implemented end-to-end CI/CD pipelines using GitHub Actions and Azure DevOps across Development, UAT, Staging, and Production environments, reducing deployment time by 50% and manual deployment errors by 80%.
- Provisioned and managed AWS infrastructure using Terraform, including EC2, RDS, IAM, VPC, Route53, Load Balancers, S3, and CloudWatch, enabling scalable and highly available production environments.
- Containerized Laravel applications using Docker and orchestrated deployments on Kubernetes (EKS/AKS) to improve deployment consistency, scalability, and reliability.
- Configured and administered Linux production servers, Nginx, Apache, SSL/TLS, DNS, Cron jobs, and IAM policies, ensuring secure, stable, and highly available production environments.
- Implemented infrastructure monitoring and alerting using Prometheus, Grafana, and AWS CloudWatch, improving system visibility, performance tuning, and proactive incident management.
- Automated database backups, disaster recovery, and cross-server synchronization using Bash, Cron, SSH, and rsync, strengthening business continuity.
- Managed Git workflows, Git Flow branching strategy, release management, deployment validation, and production releases across multiple environments.
- Designed cloud workflows for IoT-based Vehicle Surveillance Systems, integrating UVSS hardware, Laravel APIs, AWS EC2, and Amazon S3 for near real-time image processing and storage.
- Provided Production Support by troubleshooting application, database, Linux server, deployment, and cloud infrastructure issues, performing Root Cause Analysis (RCA) and incident resolution to maintain high system availability.

Leadership & Collaboration

- Collaborated with developers, QA engineers, DevOps teams, and business stakeholders to deliver enterprise applications and production releases.
- Introduced Git Flow, code review practices, deployment standards, and release processes to improve team collaboration and code quality.
- Mentored junior developers through code reviews, deployment guidance, and technical knowledge sharing.

Software Developer

Oct 2017 – Aug 2018

Adri IT Solutions — Vadodara, Gujarat

- Developed and maintained PHP/CodeIgniter backend systems and RESTful APIs, achieving 15-25% improvement in response times.
- Worked with Odoo ERP modules and gained exposure to Node.js and Angular for integrated business workflows.
- Implemented secure data encoding/decoding mechanisms ensuring data integrity across transactions.
- Managed source control, branching, and task coordination using Git and Jira for smooth team collaboration.

Backend Developer

Mar 2017 – Aug 2017

Purchase Karo Online Shopping Pvt. Ltd — Vadodara, Gujarat

- Built and scaled core PHP eCommerce platform supporting B2B and B2C order management, payments, and inventory modules.
- Designed complex transactional business logic and integrated multiple payment gateways for high-volume operations.
- Led architectural improvements during major website redesign, contributing to ~5% organic traffic increase through performance gains.

Web Developer

Aug 2016 – Feb 2017

Boiban Business Pvt. Ltd — Vadodara, Gujarat

- Resolved complex technical issues and implemented software solutions improving customer satisfaction.
- Collaborated with cross-functional teams to deliver project objectives on time.
- Troubleshoot and debugged application issues, building expertise in systematic problem-solving.

KEY DEVOPS PROJECTS & ACHIEVEMENTS- [Selected DevOps Projects]

Hybrid Cloud Storage Automation & Real-Time Sync (Laravel + Synology NAS + AWS S3)

- Designed a hybrid storage solution integrating office servers, Synology NAS, and AWS S3 for secure data synchronization.
- Developed automated Laravel-based file synchronization with near real-time cloud backup and secure API-based storage access.

IoT & Vehicle Surveillance Infrastructure (UVSS, Muller Hardware & AWS):

- Built an event-driven platform integrating UVSS hardware with Laravel APIs for real-time vehicle image processing.
- Automated image ingestion, processing, cloud storage (AWS S3), and reporting workflows with minimal latency.

Enterprise ERP Platform Integration & Orchestration (Python Odoo)

- Containerised Python-based Odoo ERP components and customised backend architecture to synchronise multi-tenant business data with third-party logistics tools.
- Handled deep database maintenance, schema alignment, and system dependency management across host servers.

Automated Shell Scripting & Database Cronjobs (Disaster Recovery):

- Automated database and application backups using Bash, Cron, SSH, and rsync with scheduled disaster recovery workflows.
- Implemented secure off-site backup strategy to improve infrastructure reliability and business continuity.

CI/CD Pipeline & Infrastructure Automation (Docker + Kubernetes + GitHub Actions + Terraform)

- Automated end-to-end AWS infrastructure provisioning (EC2, VPC, RDS) using Terraform — enabling one-command environment setup.
- Built GitHub Actions workflows to build, containerise, and deploy applications via Docker into Kubernetes (EKS/AKS) clusters.
- Achieved 80% reduction in manual deployment errors and 40% reduction in MTTR.

PROFESSIONAL DEVELOPMENT

- Advanced Cloud Infrastructure & DevOps Pipelines — Udemy
- Infrastructure as Code (IaC) with Terraform — LinkedIn Learning
- Kubernetes & GitOps Fundamentals — Udemy
- Generative AI (In Progress) — Udemy

EDUCATION

Master of Computer Applications (MCA)

Anand Institute of Information Science — Gujarat Technological University, India
